## FBS

*A proven soft-design now available as a full-backside digital progressive lens.*

Offer your patients a higher level of viewing with digitally-produced lenses.

Navigator FBS lenses use breakthrough digital technology to improve prescription accuracy while providing greater visual performance. Navigator FBS lenses deliver a greater value for patients, with wide fields of vision.

### Design Optics Defined

The features and benefits listed below describe how Navigator FBS lens translates to a more wearable, functional lens.

Features	Benefits
<b>Smoothness.</b> Soft design eliminates distortion in principal viewing areas.	Uninterrupted vision
<b>Position.</b> Back-surface puts the design closer to the eye.	Wide fields of vision
<b>Two Corridor Lengths.</b> Accommodates standard and short corridor lenses.	Consistent optics
<b>Popular Material Selection.</b> More choices for the patient's lifestyle.	Fast adaptation

Give your patients the benefits of digital technology and a proven optical design.

- Fast adaptation
- Aesthetically pleasing
- Broad corridor for a comfortable transition between viewing distances.

Navigator FBS comes with a minimum fitting height of 18mm and 14mm for Navigator Short FBS.

### Digital vs. Conventional Lenses

Conventional lenses can have more occurrence of prescription inaccuracies at the periphery of the lens. Digital Lenses, like Navigator FBS, allow for sharper vision to the edge of the lens.

### Advanced Optics at an Accessible Price

Designed with form, function and style, Navigator FBS lens is available in clear, photochromic and polarized options to suit a variety of patients' lifestyles.
